# Introduction

## Precautions

### Installation

- Install the System in a location with adequate ventilation to prevent internal heat buildup in the System.

DO NOT install the System in a location near heat sources, or in a place subject to direct sunlight, excessive dust or vibration.

- Install in a place which is level, dry and neither too hot nor too cold—between 5°C and 35°C.
- Leave sufficient distance between the System and the TV.
- Keep the speakers away from the TV to avoid interference with TV.

### Power sources

- When unplugging the System from the wall outlet, always pull on the plug, not the AC power cord.

DO NOT handle the AC power cord with wet hands.

### Moisture condensation

Moisture may condense on the lenses inside the System in the following cases:

- After starting to heat the room
- In a damp room
- If the System is brought directly from a cold to a warm place.

Should this occur, the System may malfunction. In this case, leave the System turned on for a few hours until the moisture evaporates, unplug the AC power cord, then plug it in again.

### Internal heat

- Make sure there is good ventilation around the unit. Poor ventilation could overheat and damage the unit.

DO NOT block the ventilation openings or holes. If they are blocked by a newspaper or cloth, etc., the heat may not be able to get out.

### Others

- Should any metallic object or liquid fall into the System, unplug the AC power cord and consult your dealer before operating any further.

DO NOT disassemble the System since there are no user serviceable parts inside.

- If you are not going to operate the System for an extended period of time, unplug the AC power cord from the wall outlet.

If anything goes wrong, unplug the AC power cord and consult your dealer.

# Connections

**Do not connect the AC power cord until all other connections have been made.**

- Connect VIDEO OUT directly to the video input of your TV. Connecting VIDEO OUT to a TV via a VCR may cause a monitor problem when playing back a copy-protected disc. You may also have a monitor problem when connecting the player to an integrated TV/Video system.

**1 From AM/FM antenna**  
See page 4.

**2 From the digital input of digital audio component such as CD recorder, etc.**  
See page 4.

**3 From the video input of TV/monitor**  
See page 4.

**4 From front speakers**  
See page 5.

**5 From surround speakers (MX-JE5 only)**  
See page 5.

**6 Voltage Selector**  
Before plugging in, confirm the position the voltage selector points at. See page 6.

**7 From a wall outlet**  
Plug the AC power cord only after all connections are complete.

- Before plugging in, confirm the position the voltage selector points at. See page 6 and the back cover.

\* The illustration above is for MX-JE5.

## 1 AM/FM antenna

To assemble the AM loop antenna

To connect AM/FM antenna

Extend it so that you can obtain the best reception.

For better AM/FM reception

- Disconnect the supplied FM antenna, and connect to an outdoor FM antenna using a 75  $\Omega$  wire with coaxial type connector (IEC or DIN45325).
- Make sure the antenna conductors do not touch any other terminals, connecting cords and power cord. Also, keep the antennas away from metallic parts of the System, connecting cords, and the AC power cord. This could cause poor reception.

## 2 Digital audio component

- Set "DIGITAL AUDIO OUTPUT" in the "AUDIO" preference display correctly according to the connected digital audio equipment (see page 37). If setting is incorrect, loud noise may be generated causing damage to the speakers.

## 3 TV/monitor

- To select progressive scanning mode, use COMPONENT jacks (MX-JE5 only).
- Connect the VIDEO jack, S-VIDEO jack, or COMPONENT jacks (MX-JE5 only) whichever you want to use.

When connecting the auxiliary equipment (AUX)

To set the video output selector

You can select the video output to match it to the color system of your TV.

**NTSC:** For an NTSC TV.  
**PAL:** For a PAL TV.  
For a multi-color TV, you can select either one.

## 4 Front speakers

- When connecting the speaker cords, match the polarity of the speaker terminals: (+) to (+) and (-) to (-).

### MX-JE5

### MX-JE3/MX-JE31

- Use only speakers with the same speaker impedance as indicated by the speaker terminals on the rear of the unit.
- The speakers are magnetically shielded to avoid color distortions on TVs. However, if not installed properly, it may cause color distortions. So, pay attention to the following when installing the speakers.
  - When placing the speakers near a TV set, turn off the TV's main power switch or unplug it before installing the speakers. Then wait at least 30 minutes before turning on the TV's main power switch again.

Some TVs may still be affected even though you have followed the above. If this happens, move the speakers away from the TV.

- DO NOT connect more than one speaker to each terminal.
- DO NOT push or pull the speakers as this will damage the foot spacers at the bottom of the speakers.

## To remove the speaker grilles (for MX-JE5/MX-JE31)

The illustration above is for MX-JE5.

## 5 Surround speakers (for MX-JE5)

- When connecting the speaker cords, match the polarity of the speaker terminals: (+) to (+) and (-) to (-).

- Use only speakers with the same speaker impedance as indicated by the speaker terminals on the rear of the unit.

## About surround speaker layout (MX-JE5 only)

- This equipment is not magnet-proof. If it is placed near a TV set, color on a TV screen may become uneven. Therefore, when installing, locate the speaker at sufficient distance away from the TV set.
- DO NOT place surround speakers on the top of the front main speakers.

## 6 Voltage Selector

Use a screwdriver to rotate the voltage selector so that the voltage mark is pointing at the same voltage as where you are plugging in the unit. (See also the back cover page.)

When your mains lead (AC) line voltage is 230-240V

Voltage mark

When your mains lead (AC) line voltage is 220 V

# Additional Information

## Learning More about This System ● ● ●

### Introduction (see pages 1 and 2)

#### Playable Disc Types:

- If you play back an NTSC disc with the video output selector set to “PAL,” you can watch the playback pictures (the disc will be reproduced using “PAL 60” format), but the TV screen may roll over upward and downward rapidly.
- If you play back a PAL disc with the video output selector set to “NTSC,” you can watch the playback pictures, but the following symptoms may occur:
  - The items on the disc menu will be blurred, and be shown slightly shifted when highlighted.
  - The aspect ratio of the picture may differ from the original aspect ratio.
  - The picture movement is not smooth.
- **About audio format**
  - **Linear PCM:** Uncompressed digital audio, the same format used for CDs and most studio masters.
  - **MLP:** Compressed digital audio which enables lossless compression of DVD Audio.
  - **Dolby Digital:** Compressed digital audio, developed by Dolby Laboratories, which enables multi-channel encode to create the realistic surround sound.
  - **DTS (Digital Theater Systems):** Compressed digital audio, developed by Digital Theater Systems, Inc., which enables multi-channel like Dolby Digital. As the compression ratio is lower than for Dolby Digital, it provides wider dynamic range and better separation.

### Daily Operations—Playback (see pages 8 to 12)

#### Listening to the Radio:

- If you store a new station into an occupied preset number, the previously stored station in that number will be erased.
- When you unplug the AC power cord or if a power failure occurs, the preset stations will be erased in a few days. If this happens, preset the stations again.

#### Playing Back a Disc:

- On some DVD, SVCD, or VCD discs, the actual operations may be different from what is explained in this manual, due to the programming and disc structure; such differences are not a malfunction of this System.
- **MX-JE5 only:** Some DVD Audios prohibit downmix. When you play back such a disc, “LR ONLY” appears on the display and the System plays back the left front and right front signals.
- **MX-JE5 only:** When playing back a DVD Audio disc recorded in MLP (Meridian Lossless Packing; a lossless audio compression system that can completely recreate the PCM signals), the signals are recognized as the linear PCM signals, however, no indicator lights up in the display window.

#### • For MP3/WMA playback...

- MP3 discs are required a longer readout time than regular CDs. (It depends on the complexity of the group/file configuration.)
- Some MP3/WMA files cannot be played back and will be skipped. This results from their recording processes and conditions.
- When making MP3/WMA discs, use ISO 9660 Level 1 or Level 2 for the disc format.
- This system can play back MP3/WMA files with the extension code <.mp3> or <.wma> (regardless of the letter case—upper/lower).
- It is recommended that you make each MP3/WMA file at a sampling rate of 44.1 kHz and at bit rate of 128 kbps. This System cannot play back files made at bit rate of less than 64 kbps.

#### Playing Back a Tape:

- In Relay Play, if the playing time of the tape in deck A is less than 12 seconds, the System rewinds the tape and plays back again.

### Daily Operations—Sound&Other Adjustments (see pages 13 to 16)

#### Creating Your Own Sound Modes—User Mode:

- When you unplug the AC power cord or if a power failure occurs, the User Mode settings will be erased in a few days. If this happens, set the User Mode again.

#### Creating 3-dimensional Sound Field—3D Phonic:

- While you use the headphones, 3D Phonic mode is canceled temporarily.
- When you activate the mic mixing, 3D Phonic mode is canceled temporarily.
- 3D Phonic setting is also applied to the optical digital output signals through the OPTICAL DIGITAL OUTPUT terminal.

#### Changing the Scanning Mode (MX-JE5 only):

- Do not change the progressive scanning mode in the following cases:
  - When your TV does not support the progressive video input.
  - When you have not connected your TV to the unit using a component video cord.
- When you play back an NTSC disc in progressive scanning mode, the System output the NTSC signal regardless of color system settings.

#### Setting the Clock:

- “0:00” will flash on the display until you set the clock.
- The clock may gain or lose 1 to 2 minutes per month. If this happens, reset the clock.

## Unique DVD/VCD Operations (see pages 17 to 19)

### Selecting the Sound Track:

- On some DVD Videos, you cannot change audio languages while playing back.

### Playing Back a Bonus Group (MX-JE5 only):

- You cannot select a track in the bonus group for Program Play.

### Special Picture Playback:

- During slow-motion playback, no sound will be reproduced.
- While zoomed in, the picture may look coarse.

## Advanced Disc Operations (see pages 20 to 22)

### Programming the Playing Order—Program Play:

- While programming steps...  
Your entry will be ignored if you have tried to program an item number that does not exist on the disc (for example, selecting track 14 on a disc that only has 12 tracks).
- You cannot use Program Play and Random Play for JPEG discs.

## On-Screen Disc Operations (see pages 23 to 27)

### Operations Using the On-screen Bar:

- **A-B Repeat:**
  - A-B Repeat cannot be used on some DVDs.
  - A-B Repeat is possible only within the same title or within the same track.

### Operations on the CONTROL Screen:

- For JPEG files playback...
  - It is recommended that you record a file at 640 x 480 resolution. (If a file has been recorded at a resolution of more than 640 x 480, it will take a long time to be shown.)
  - This System can play only baseline JPEG files\*. Progressive JPEG files\* or lossless JPEG files\* cannot be played.
    - \* Baseline JPEG format: Used for digital cameras, web, etc.
    - Progressive JPEG format: Used for web.
    - Lossless JPEG format: An old type and rarely used now.
- This system can play back JPEG files with the extension code <.jpg> or <.jpeg> (regardless of the letter case-upper/lower).
- This system may not play back JPEG files properly if they are recorded on the devices other than digital still camera.
- During slide-show playback, zoom cannot be operated.

## Recording Operations (see pages 28 to 29)

### Recording on a Tape:

- The recording level is automatically set correctly. Thus, you can adjust the sound you are actually listening to without affecting the recording level.
- There is leader tape which cannot be recorded onto at the start and the end of cassette tapes. Thus, when recording discs or radio broadcasts, wind the leader tape first to ensure that the recording will be made without any music part lost.
- If no cassette is inserted, “NO TAPE” appears on the display. If a protected tape has been inserted, “NO REC” appears on the display.
- When using Reverse Mode for recording, start recording in the forward (▶) direction first; otherwise, recording will stop when only one side (reverse) of the tape is recorded.
- You cannot change the source during recording.

### Synchronized Disc Recording:

- While recording, you cannot use ►►/◄◄, ►►/◄◄, DVD LEVEL, 3D PHONIC and source buttons.
- You can adjust volume control and sound setting (Active Bass Extension, Rhythm AX – for MX-JE5, Sound Turbo –for MX-JE3/JE31), sound mode but the settings do not affect the recording sound.
- Everything on the disc goes onto the tape in the order on the disc, or according to the order you have made for Program Play.
- You cannot use Repeat Play while synchronized recording (Repeat Play will be canceled).
- When recording starts, “DISC REC” appears on the display and the REC (recording) lamp flashes.
- When the tape reaches its end in the forward direction (▶) during recording, the last song will be re-recorded at the beginning of the reverse side (◄).
- When the tape reaches its end in the reverse side (◄) during recording, recording stops even though the disc is not entirely recorded.

## Enjoying Karaoke (see pages 30 to 33)

### Singing along (Karaoke):

- By pressing REC START/STOP, you can record your singing along if you want.
- MX-JE5 only: Key control cannot be activated while DVD Audio is played.

### Singing Along Using the Stereo Discs—Vocal Masking:

- Vocal Masking Mode setting is also applied to the optical digital output signals through the OPTICAL DIGITAL OUTPUT terminal.
- On some music, Vocal Masking does not provide the correct effect.

## Timer Operations (see pages 34 to 35)

### Setting the Timer:

- If you do not specify the preset station or track number correctly while setting a timer, the currently selected station or the first track will be played when timer is activated.
- When you unplug the AC power cord or if a power failure occurs, the timer will be canceled. You need to set the clock first, then the timer again.
- Without stopping the recording, you cannot change the source after Recording Timer starts recording.
- If you set DVD Video as the source, Daily Timer will not work correctly.

### Timer Priority:

- If you set the Sleep Timer after Daily Timer starts playing the selected source, Daily Timer is canceled.
- If you set the Sleep Timer after Recording Timer starts recording, Recording Timer is canceled, but recording continues until Sleep Timer shuts off the power.

## Setup Menu Operations (see pages 36 to 37)

### General:

- If the upper and lower parts of the menu are cut off, adjust the picture size control of the TV.

### LANGUAGE menu:

- When the language you have selected for MENU LANGUAGE, AUDIO LANGUAGE, or SUBTITLE is not recorded on a disc, the original language is used as the initial language.

### PICTURE menu—MONITOR TYPE:

- Even if “4:3 PS (MULTI)” is selected, the screen size may become 4:3 letter box with some DVD Videos. This depends on how the discs are recorded.
- When you select “16:9 (MULTI)” for a picture whose aspect ratio is 4:3, the picture slightly changes due to the process for converting the picture width.

### AUDIO menu—DOWN MIX:

- This setting is not effective when DTS multi-channel software is played back.

### OTHERS menu—ON SCREEN GUIDE:

- The setup menu and on-screen bar will be displayed (and recorded) even though this function is set to “OFF.” Subtitles and the information for zoom-in always appear on the display regardless of this setting.

## Maintenance

To get the best performance of the System, keep your discs, tapes, and mechanism clean.

### Handling discs

- Remove the disc from its case by holding it at the edge while pressing the center hole lightly.
- Do not touch the shiny surface of the disc, or bend the disc.
- Put the disc back in its case after use to prevent warping.
- Be careful not to scratch the surface of the disc when placing it back in its case.
- Avoid exposure to direct sunlight, temperature extremes, and moisture.

### To clean the disc:

Wipe the disc with a soft cloth in a straight line from center to edge.

### Handling cassette tapes

- If the tape is loose in its cassette, take up the slack by inserting a pencil in one of the reels and rotate it.
  - If the tape is loose, it may get stretched, cut, or caught in the cassette.
- Be careful not to touch the tape surface.
- Avoid the following places to store the tape—in dusty places, in direct sunlight or heat, in moist areas, on a TV or speaker, or near a magnet.

### To keep the best recording and playback sound quality:

- Use a cotton swab moistened with alcohol to clean the heads, capstans, and pinch rollers.
- Use a head demagnetizer (available at electronics and audio shops) to demagnetize the heads (when the System turned off).

### Cleaning the System

- Stains should be wiped off with a soft cloth. If the System is heavily stained, wipe it with a cloth soaked in water-diluted neutral detergent and wrung well, then wipe clean with a dry cloth.
- Since the System may deteriorate in quality, become damaged or get its paint peeled off, be careful about the following:
  - DO NOT wipe it with a hard cloth.
  - DO NOT wipe it strong.
  - DO NOT wipe it with thinner or benzine.
  - DO NOT apply any volatile substance such as insecticides to it.
  - DO NOT allow any rubber or plastic to remain in contact for a long time.

## Troubleshooting

If you are having a problem with your System, check this list for a possible solution before calling for service.

### General:

#### **Adjustments or settings are suddenly canceled before you finish.**

⇒ There is a time limit. Repeat procedure again.

#### **Operations are disabled.**

⇒ The built-in microprocessor may malfunction due to external electrical interference. Unplug the AC power cord and then plug it back in.

#### **Unable to operate the System from the remote control.**

⇒ The path between the remote control and the remote sensor on the System is blocked.

⇒ The batteries are exhausted.

#### **No sound is heard.**

⇒ Speaker connections are incorrect or loose.

⇒ Headphones are connected.

#### **No picture appears on the screen.**

⇒ The video cord connections are incorrect or loose.

#### **No picture is displayed on the TV screen, the picture is blurred, or the picture is divided into two parts.**

⇒ MX-JE5 only: The System is connected to a TV which does not support progressive video input.

⇒ Incorrect color system is selected (see “To set the video output selector” on page 4).

#### **The left and right edges of the picture are missing on the screen.**

⇒ Select “4:3 LB (4:3 MULTI LB)” for “MONITOR TYPE” (see page 36).

### Radio Operations:

#### **Hard to listen to broadcasts because of noise.**

⇒ Antennas connections are incorrect or loose.

⇒ The AM loop antenna is too close to the System.

⇒ The FM antenna is not properly extended and positioned.

### Disc Operations:

#### **The disc does not play.**

⇒ The disc is placed upside down. Place the disc with the label side up.

⇒ Parental Lock is in use (see page 37).

#### **ID3 Tag on an MP3 disc cannot be shown.**

⇒ There are two types of ID3 Tag—Version 1 and Version 2. This System can only show ID3 Tag Version 1.

#### **MP3 groups and tracks are not played back as you expect.**

⇒ The playing order is determined when the disc was recorded. It depends on the writing application.

#### **MP3/WMA or JPEG files are not played back.**

⇒ The inserted disc may include both type of tracks (MP3/WMA files and JPEG files). In this case, you can only play back the files selected by the “FILE TYPE” setting (see page 37).

⇒ You have changed the “FILE TYPE” (see page 37) setting after you inserted a disc. In this case, reload the disc.

#### **The disc sound is discontinuous.**

⇒ The disc is scratched or dirty.

#### **The disc playback sounds strange.**

⇒ Cancel Key Control (see page 31).

#### **No subtitle appears on the display though you have selected the initial subtitle language.**

⇒ Some DVDs are programmed to always display no subtitle initially. If this happens, press SUB TITLE after starting play (see page 18).

#### **Audio language is different from the one you have selected as the initial audio language.**

⇒ Some DVDs are programmed to always use the original language initially. If this happens, press AUDIO after starting play (see page 17).

#### **The disc tray does not open or close.**

⇒ The AC power cord is not plugged in.

⇒ Child Lock is in use. “LOCKED” appears in the display window (see page 22).

### Tape Operations:

#### **The cassette holder cannot be opened.**

⇒ Power supply from the AC power cord has been cut off while the tape was running. Turn on the System.

### Recording Operations:

#### **Impossible to record.**

⇒ Small tabs on the back of the cassette are removed. Cover the holes with adhesive tape.

### Timer Operations:

#### **Daily Timer does not work.**

⇒ The System has been turned on when the on-time comes. Timer starts working only when the System is turned off.

### Setup Menu Operations:

#### **When you forget your password for Parental Lock.**

⇒ Enter “8888.”
